Reviews

The very best publication i actually go through. It can be packed with knowledge and wisdom It is extremely difficult to leave it before concluding, once you begin to read the book.
(Rhea Kunze)

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 42 pages. Original publisher: Aberdeen Proving Ground, MD : Army Research Laboratory, 2004 OCLC Number: (OCOlc)690110741 Subject: Trajectories (Mechanics) -- Computer simulation. Excerpt: . . . Zero-spin coning motion D C iC i C C C . (14)m n m m mq VHere, the side-moment is proportional to the pitch-damping moment coefficient sum and varies linearly with the coning rate and sine of the total angle of attack For small angles of attack, the cosine of the total angle of attack, , can be assumed to be one. The pitch-damping coefficient sum can also be determined by simply adding the individual damping coefficients. In practice, there is very little difference in the two results. However, for the current study, directly predicting the pitch-damping coefficient sum using coning motion provides an alternative prediction of the pitch-damping sum and additional confirmation of the predictions of the individual coefficients. 2. Computational Technique In the previous section, several types of steady motion were presented that produce aerodynamic forces and moments from which the various pitch-damping coefficients can be obtained. One unique feature of these motions is that they are steady. The advantage of a steady motion over an unsteady motion is that a potentially time-independent flowfield can be produced by a steady motion, permitting analysis using steady flow CFD techniques. Such techniques can be computationally less expensive than time-dependent CFD approaches. To fully exploit the steady character of the flow, special body-fixed coordinate systems have been employed to capture the steady flowfield. One feature of these coordinate frames is that they are rotating at a constant rate with respect to an inertial frame. Because of this, the governing equations of fluid motion must be modified to take into account the...
