S. health agencies information, and other documentation to disclose whats in vaccines that consumers, unfortunately, do not know. Vaccine ingredients can include such components as Thimerosal, which is 49.6 ethylmercury, aluminum, 2-Phenoxyethanol, formaldehydeFormalin, polysorbate 80, phenol, antibiotics, gluteraldehyde, MSG, sodium borate, plus a shopping list of other neurotoxic chemicals, along with vaccine production media that includes anything from monkey kidney and other animal tissues to genetically engineered insect virus to diploid cells, which are aborted human fetal tissue. Surely, vaccines are not just an antigen and saline water, as many health professionals would have you believe. The book discusses adverse effects from vaccines both in trials, and in foreign countries where vaccination campaigns are being closed down by governments due to so many adverse effects from vaccines--something the U. S. media doesnt report. Vaccination politics and how they affect everyone from the newborn infant to senior citizen become apparent with the authors candid discussion of what her research of vaccines since the 1980s has uncovered. Many of the myths revolving around vaccines and vaccinations are exposed for what they truly are, public relations and media spin. Vaccination Voodoo, What YOU Dont Know About Vaccines will open readers eyes to information they should know and utilize as part of being informed healthcare consumers. This item ships from La Vergne, TN. Paperback.
