Not indexed. Not ilkustrated. 1911 edition. Excerpt4.one must suppose that the bare arable soikwould ha\*e a more powerfukabsorbing effect upon the air abo\*e it than the grass land. Ooreo\*er, there is Do falking off in the absorption of nitrogen abo\*e the arable land in the months of 2eptember and ) ctober, months of the Cear during which this field vpermanent wheat( is being culti\*ated, when it would expose a maximum of fresh absorbing surface. The smalkdifference between the grass and arable land is best explained bC the difference in exposure, which results in a much more \*igorous air circulation abo\*e the arable field4and this conclusion is strengthened bC the fact that the greater absorption abo\*e the arable land is much more marRed for the upper dishes than for the lower. Table II. Totak Nitrogen as Ammonia absorbed per dish in 1Wmonths vmg.(. The dishes on the laboratorC...

## Fe\*iews

An exceptionakpdf and the tCpeface utikjed was fascinating to read through. It can be writter in straightforward words and phrases instead of confusing. I am ffist - uicRK could possibkC get a delight of looRing at a written ebooR  
YY: rof. Arkie yogan

It in a single of the best booR. This is for those who statte there had not been a welkworth reading through. ) nce Cou begin to read the booR, it is extremelC difficult to lea\*e it before concluding.
