Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.Pursuant to a congressional request, GAO reviewed the use of information technology in publishing the Federal Register (FR). GAO found that: (1) most FR documents are currently processed exclusively on paper until final composition at the Government Printing Office (GPO); (2) GPO offered agencies a discount for submission of fully coded documents on disks, but agency officials thought that the costs associated with developing and maintaining a coding capability were greater than the possible discounts; (3) in September 1991, the Office of the Federal Register (OFR) established a task force to increase the number of FR documents submitted in electronic format; (4) GPO and OFR have collaborated on pilot projects to test certain electronic dissemination formats; (5) if GPO included graphics in its FR database, it could capture information that was not in machine-readable format; (6) closer coordination in the early stages of the planning process and better assessment of potential automation benefits, costs, and needed resources could have made the development of some FR electronic technology projects more efficient and avoided delays; (7) the Administrative Committee of the Federal Register (ACFR) did not provide the continuing oversight needed to direct and support the FR/Code of Federal Regulations (CFR) automation initiatives; and (8) OFR and GPO had no current, formally articulated plan describing FR/CFR production and dissemination systems and technologies they expected to have in operation 5 or more years from now.
